

Bandsaw machine DYNASAW530

DIMENSIONS

CUTTING TECHNOLOGY

DYNASAW530: Advanced cutting technology at an affordable price

AMADA's newly developed concept enables this fully automatic bandsaw machine to set new standards in cost-efficiency and tool life.

The sturdy, column-guided construction of the DYNASAW530, in conjunction with the use of AMADA bi-metal or carbide-tipped bandsaw blades, results in optimum cutting results and extended tool life.

- CNC-Control
- Automatic table cleaning
- Wire brush bar in the table reducing the burr at the cutted piece
- 35 mm remnant piece length
- Automatic wire brush
- 700 mm feed length per stroke
- Automatic loading function
- Automatic blade guide arm positioning

TECHNICAL DATA

| | |
|-----------------------|----------------------------------|
| Cutting capacity (mm) | Ø 530, 530 × 530 |
| Motor power (kW) | Blade drive 7,5 Hydraulic 1,5 |
| Material feed (mm) | per stroke 700 |
| Blade speed (m/min) | 15-120 stepless |
| Table height (mm) | 740 |

| | |
|--------------------------|--------------------|
| Saw blade dimension (mm) | 54 × 1,6 × 5920 |
| Machine dimension (mm) | 2813 × 2261 × 2180 |
| Machine weight (kg) | 4500 |
| Color | red/black |
